Pharmaceutical	Quality Assurance and Quality Control
Science	Biotechnology, Drug Control, Forensic, Quality Assurance & Control and Research

Labquip provides global workplace laboratory solutions for Science, Education, Environmental, Healthcare, Engineering, Agricultural and Pharmaceutical applications and can supply a wide range of products within the ranges mentioned above.

Within our catalogues you will find a comprehensive range of laboratory, scientific, healthcare equipment and chemicals. Our experience and focus on serving clients internationally makes Labquip your ideal partner for all your procurement needs, so effectively we can be your single source solution.

Whether your purchasing requirement is large or small, Labquip provides a solution and a partner committed to streamlining the process, performing flawlessly, managing costs and providing sustainability.

## Project Management Capabilities

With experience in providing Equipment Specifications, Facilities Design & Planning, Worldwide Sourcing, Procurement, Equipment Acceptance, Installation & Commissioning, Training and After Sales Service we are able to offer full Project Management Capabilities alongside individual equipment supply contracts.

Our wealth of experience in working alongside major Funding organizations allows us to play a major role in developing contacts with Export Credit Agencies, Investment Banks and Multilateral Development Banks which can provide Project Finance for turnkey opportunities in the developing world.

### Equipment specification

Utilising our extensive product/resource database. Detailed equipment lists can be compiled.

### Facilities design & planning

Customised to your requirements on the latest computer aided design and desktop publishing technology systems.

### Worldwide sourcing

Ensuring competitive pricing, tendering and specification compliance.

### Procurement

Full consolidation, inspection and packing in accordance with international standards and tender specifications.

### Equipment & logistics mobilisation

A feature of our management service is the control and tracking of complex multi modal freight movements to multi-site destinations.

### Equipment acceptance

Receipt of goods using state of the art management systems.

### Installation & commissioning

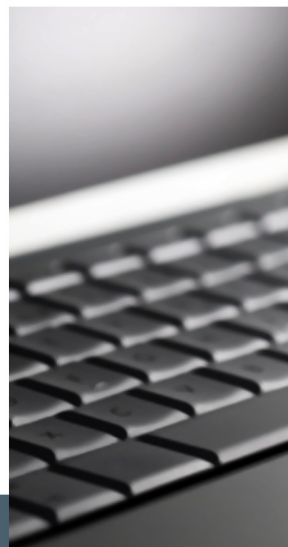

Using our own in-house technical expertise and also specialist factory trained personnel as and when required.

### Training

Learning objectives established, and then training modules and programs are tailor made to suit the needs of the client.

### After sales service

Comprehensive equipment maintenance service achieved via our inventory control and asset management systems, which can also include preventative maintenance.
